三、完型填空题

Geography is the study of the relationship between people and the land. Geographers (地理学家) compare and contrast 1 places on the earth. But they also 2 beyond the individual places and consider the earth as a 3. The word geography 4 from two Greek words, ge, the Greek word for "earth" and graphein, 5 means "to write." The English word geography means "to describe the earth." 6 geography books focus on a small area 7 a town or city. Others deal with a state, a region, a nation, or an 8 continent. Many geography books deal with the whole earth. Another 9 to divide the study of 10 is to distinguish between physical geography and cultural geography. The former focuses on the natural world; the 11 starts with human beings and 12 how human beings and their environment act 13 each other. But when geography is considered as a single subject, 14 branch can neglect the other. A geographer might be described 15 one who observes, records, and explains the 16 between places. If all places 17 alike, there would be little need for geographers. We know, however, 18 no two places are exactly the same. Geography, 19, is a point of view, a special way of 20 at places.

四、阅读理解题

In the United States, the need to protect plant and animal species has become a highly controversial and sharply political issue since the passage of the Endangered Species Act in 1973. The act, designed to protect species' living areas, and policies that preserve land and forests compete with economic interests. In the 1990's, for example, the woodcutters in the Western United States were challenged legally in their attempt to cut trees for timber in the Cascade Mountains. The challenge was mounted to protect the endangered spotted owl (猫头鹰), whose remaining population occupies these forests and requires the intact, ancient forest for survival. The problematic situation set the interests of environmentalists against those of corporations and of individuals who stood to lose jobs. After months of debate and legal battles, the fate of the woodcutter and the owls — was still undecided in mid-1992. Similar tensions exist between the developed and the developing nations. Many people in industrialized nations, for example, believe that developing nations in tropical regions should do more to protect their rainforests and other natural areas. But the developing countries may be impoverished (使穷困) with populations growing so rapidly that using the land is a means to temporarily avoid worsening poverty and starvation.

Many of the changes to Earth that scientists concern have the potential to rob the planet of its biological richness. The destruction of Earth's ozone layer (臭氧层), for example, could contribute to the general process of impoverishment by allowing ultra-violet rays to harm plants and animals. And global warming could wipe out species unable to quickly adapt to changing climates. Clearly, protecting Earth's biological diversity is a complex problem. But solutions to humanity's current problems will come only through coordinated international efforts to control human

population, stabilize the composition of the atmosphere, and preserve intact Earth's complex web of life.

1. Why does the author say that the protection of endangered species is a highly controversial issue?

- A. Because people can't agree as to what species to protect.
- B. Because it is difficult to find an effective way to protect such species.
- C. Because it affects the interests of certain groups of people.
- D. Because it is a major problem involving a series of legal procedures.

2. According to the passage, the preservation of rainforests_____.

- A. may hamper a developing country in its fight against poverty
- B. benefits developed countries rather than developing countries
- C. should take priority over the control of human population
- D. will help improve the living conditions in developing countries

3. According to the passage, cutting trees to grow more food _____.

- A. will widen the gap between the developed and the developing countries
- B. is but a short-term relief to the food problem
- C. call hardly alleviate the shortage of food
- D. proves to be an effective way for impoverished nations

4. Among "humanity's current problems" (Line 7, Para. 2), the chief concern of the scientists is _____.

- A. the impoverishment of developing countries
- B. the explosion of the human population
- C. the reduction of biological diversity
- D. the effect of global warming

5. The author's purpose in writing this passage is_____.

- A. to describe the difficulties in solving humanity's current problems
- B. to present the different views on humanity's current problems
- C. to analyze the contradiction between countries in dealing with humanity's current problems
- D. to point out that humanity's current problems can only be solved through the cooperation of nations
